# Calhoun CUSD # 40 Wellness Policy

*This district-level wellness policy meets the minimum Federal standards for local school wellness policy implementation under the Healthy, Hunger-Free Kids Act of 2010, the Alliance for a Healthier Generation Healthy Schools Program.*

## Preamble

Calhoun 40 School District hereto referred to as the District is committed to the optimal development of every student. The District believes that for students to have the opportunity to achieve personal, academic, developmental, and social success, we need to create positive, safe, and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that two components, good nutrition and physical activity before, during, and after the school day, are strongly correlated with positive student outcomes. For example, student participation in the U.S. Department of Agriculture's (USDA) School Breakfast Program is associated with higher grades and standardized test scores, lower absenteeism, and better performance on cognitive tasks.<sup>1,2,3,4,5,6,7</sup> Conversely, less-than-adequate consumption of specific foods including fruits, vegetables, and dairy products, is associated with lower grades among students.<sup>8,9,10</sup> In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education, and extracurricular activities – do better academically.<sup>11,12,13,14</sup>

This policy outlines the District's approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this policy establishes goals and procedures to ensure that:

- Students in the District have access to healthy foods throughout the school day—both through reimbursable school meals and other foods available throughout the school campus—in accordance with Federal and state nutrition standards;
- Students receive quality nutrition education that provides them the knowledge to develop lifelong healthy eating behaviors;
- Students have opportunities to be physically active during school hours through P.E. classes and after school via extracurricular activities;
- Schools engage in nutrition and physical activity promotion and other activities that promote student wellness;
- School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school;
- The community is engaged in supporting the work of the District in creating continuity between school and other settings for students and staff to practice lifelong healthy habits; and
- The District establishes and maintains an infrastructure for management, oversight, implementation, communication about, and monitoring of the policy and its established goals and objectives.

This policy applies to all students, staff, and schools in the District.

## **I. School Wellness Committee**

### ***Committee Role and Membership***

The District will establish a District Wellness Committee (hereto referred to as the DWC) that meets at least four times per year to establish goals for and oversee school health and safety policies and programs, including development, implementation, and periodic review and update of this district-level wellness policy.

The DWC membership will represent both the elementary and the high school, and include (to the extent possible), but not be limited to: parents and caregivers; students; the district nurse, the district social worker, physical education teachers; health education teachers, and one or more district administrators.

### ***Leadership***

The Superintendent or designee(s) will convene the DWC and facilitate development of and updates to the wellness policy, and will ensure each school's compliance with the policy.

The name(s), title(s), and contact information (email address is sufficient) of this/these individual(s) is:

Name	Title	Email address	Role
Cheri Burris	H.S. Principal	<a href="mailto:cburris@calhoun40.net">cburris@calhoun40.net</a>	Parent/Planning/Implementation
Kathy Schell	Elem. Principal	<a href="mailto:kschell@calhoun40.net">kschell@calhoun40.net</a>	Planning/Implementation
Dianne Bick	Food Service	<a href="mailto:dbick@calhoun40.net">dbick@calhoun40.net</a>	NSL Policies
Lisa Dolan	Nurse	<a href="mailto:ldolan@calhoun40.net">ldolan@calhoun40.net</a>	Nutrition/Health
Mark Baalman	P.E. Teacher	<a href="mailto:mbaalman@calhoun40.net">mbaalman@calhoun40.net</a>	Physical Activities
Mark Hillen	P.E. Teacher	<a href="mailto:mhillen@calhoun40.net">mhillen@calhoun40.net</a>	Physical Activities
Traci Hillen	Social Worker	<a href="mailto:thillen@calhoun40.net">thillen@calhoun40.net</a>	Physical/Emotional Health Connection
Kate Sievers	Superintendent	<a href="mailto:ksievers@calhoun40.net">ksievers@calhoun40.net</a>	District Leadership/Policy Approval

Each school will ensure compliance with the policy under the coordination of the DWC.

## **II. Wellness Policy Implementation, Monitoring, Accountability, and Community Engagement**

### ***Implementation Plan***

The District will develop and maintain a plan for implementation to manage and coordinate the execution of this wellness policy. The plan delineates roles, responsibilities, actions, and timelines specific to each school, and includes information about who will be responsible to make what change, by how much, where, and when, as well as specific goals and objectives for nutrition standards for all foods and beverages available on the school campus, food and beverage marketing, nutrition promotion and education, physical activity, physical education, and other school-based activities that promote student wellness. It is recommended that the school use the [Healthy Schools Program online tools](#) to complete a school level assessment based on the Centers for Disease Control and Prevention's School Health Index, create an action plan that fosters implementation, and generate an annual progress report.

This wellness policy and the progress reports can be found at: [www.calhoun40.net](http://www.calhoun40.net)

### ***Triennial Progress Assessments***

At least once every three years, the District will evaluate compliance with the wellness policy to assess the implementation of the policy and include:

- The extent to which schools under the jurisdiction of the District are in compliance with the wellness policy;
- A description of the progress made in attaining the goals of the District's wellness policy.

The position/person responsible for managing the triennial assessment and contact information is the district superintendent.

The DWC, in collaboration with individual schools, will monitor schools' compliance with this wellness policy.

The District will actively notify households/families of the availability of the triennial progress report.

### ***Revisions and Updating the Policy***

The DWC will update or modify the wellness policy based on the results of the annual progress reports and triennial assessments, and/or as District priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. **The wellness policy will be assessed and updated as indicated at least every three years, following the triennial assessment.**

### ***Community Involvement, Outreach, and Communications***

The District is committed to being responsive to community input, which begins with awareness of the wellness policy. The District will actively communicate ways in which representatives of DWC and others can participate in the development, implementation, and periodic review and update of the wellness policy through a variety of means appropriate for that district. The District will also inform parents of the improvements that have been made to school meals and

compliance with school meal standards, availability of child nutrition programs and how to apply, and a description of and compliance with Smart Snacks in School nutrition standards. The District will use electronic mechanisms, such as email or displaying notices on the district's website, as well as non-electronic mechanisms, such as newsletters, presentations to parents, or sending information home to parents, to ensure that all families are actively notified of the content of, implementation of, and updates to the wellness policy, as well as how to get involved and support the policy. The District will ensure that communications are culturally and linguistically appropriate to the community, and accomplished through means similar to other ways that the district and individual schools are communicating other important school information with parents.

The District will actively notify the public about the content of or any updates to the wellness policy annually, at a minimum. The District will also use these mechanisms to inform the community about the availability of the annual and triennial reports.

### **III. Nutrition**

#### ***School Meals***

Our school district is committed to serving healthy meals to children, with plenty of fruits, vegetables, whole grains, and fat-free and low-fat milk; moderate in sodium, low in saturated fat, and zero grams' *trans*-fat per serving (nutrition label or manufacturer's specification); and to meet the nutrition needs of school children within their calorie requirements. The school meal programs aim to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns, and support healthy choices while accommodating cultural food preferences and special dietary needs.

All schools within the District participate in USDA child nutrition programs, including the National School Lunch Program (NSLP), and the School Breakfast Program (SBP). The District also operates additional nutrition-related programs and activities including. All schools within the District are committed to offering school meals through the NSLP and SBP programs, and other applicable Federal child nutrition programs, that:

- Are accessible to all students;
- Are appealing and attractive to children;
- Are served in clean and pleasant settings;
  - Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations. (The District offers reimbursable school meals that meet [USDA nutrition standards](http://www.fns.usda.gov/school-meals/nutrition-standards-school-meals).)... <http://www.fns.usda.gov/school-meals/nutrition-standards-school-meals>.
- Promote healthy food and beverage choices using the following [Smarter Lunchroom techniques](#):
  - Sliced or cut fruit is available daily
  - Daily fruit options are displayed in a location in the line of sight and reach of students
  - Daily vegetable options are bundled into all grab and go meals available to students
  - All staff members, especially those serving, have been trained to politely prompt students to select and consume the daily vegetable options with their meal
  - Student surveys and taste testing opportunities are used to inform menu and promotional ideas
  - Student artwork is displayed in the service and/or dining areas
  - Daily announcements are used to promote and market menu options

- *Menus will be posted on the District website or individual school websites. Nutrient content and ingredients can be made available upon request.*
- *Menus will be created by a school cook.*
- *School meals are administered by the District's school cooks.*
- *The District child nutrition program will accommodate students with special dietary needs.*
- *Students will be allowed at least 10 minutes to eat breakfast and at least 20 minutes to eat lunch, counting from the time they have received their meal and are seated (meets HSP Gold level). Students are served lunch at a reasonable and appropriate time of day.*
- *In any given school year, lunch may follow the recess period to better support learning and healthy eating when scheduling permits.*
- *Participation in Federal child nutrition programs will be promoted among students and families to help ensure that families know what programs are available in their children's school.*
- *The District will implement the following Farm to School activities:*
  - *Messages about agriculture and nutrition are reinforced throughout the learning environment via the classroom teacher, volunteer presenters, and University of IL Extension representatives.*
  - *School hosts on-site field trips where farm animals are brought in during FFA Farm Day.*
  - *School utilizes promotions or special events, such as tastings, that highlight regional products.*

*The district schools utilize the "offer vs. serve" option for school lunch. Students must choose at least ONE of the two vegetable choices or the fruit. In addition, students must take 2 other items to be counted as a reimbursable meal.*

### ***Students with Diabetes and/or Peanut Allergies Precautions***

*Students with diabetes will have an individualized "care plan" and alternative food forms will be on file in the school nurse's office at both district schools.*

*For student safety and well-being, those students identified as having peanut allergies will be seated with those students who purchase the school lunch as opposed to sitting with those who bring their lunch from home, since the school meals are mandated to be "peanut free".*

### ***Staff Qualifications and Professional Development***

All school nutrition program directors, managers, and staff will meet or exceed hiring and annual continuing education/training requirements in the [USDA professional standards for child nutrition professionals](#). These school nutrition personnel will refer to [USDA's Professional Standards for School Nutrition Standards website](#) to search for training that meets their learning needs.

### ***Water***

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day\* and throughout every school campus\* ("school campus" and "school day" are defined in the glossary). The District will make drinking water available where school meals are served during mealtimes. In addition, students will be allowed to bring and carry (approved) water bottles filled with only water with them throughout the day.

### ***Competitive Foods and Beverages***

The District is committed to ensuring that all foods and beverages available to students on the school campus\* during the school day\* support healthy eating. The foods and beverages sold

and served outside of the school meal programs (i.e., “competitive” foods and beverages) will meet the USDA Smart Snacks in School nutrition standards, at a minimum. Smart Snacks aim to improve student health and well-being, increase consumption of healthful foods during the school day, and create an environment that reinforces the development of healthy eating habits. A summary of the standards and information are available at:

<http://www.fns.usda.gov/healthierschoolday/tools-schools-smart-snacks...>

[\(http://www.fns.usda.gov/healthierschoolday/tools-schools-focusing-smart-snacks\)](http://www.fns.usda.gov/healthierschoolday/tools-schools-focusing-smart-snacks). The Alliance for a Healthier Generation provides a set of tools to assist with implementation of Smart Snacks available at [www.healthiergeneration.org/smartsnacks...](http://www.healthiergeneration.org/smartsnacks...)

([https://www.healthiergeneration.org/take\\_action/schools/snacks\\_and\\_beverages/smart\\_snacks/](https://www.healthiergeneration.org/take_action/schools/snacks_and_beverages/smart_snacks/))

*[NOTE: In some cases, states have passed more stringent nutrition standards for competitive foods and beverages in addition to the USDA Smart Snacks in School nutrition standards. In these states, districts and schools must also comply with their state standards.]*

To support healthy food choices and improve student health and well-being, all foods and beverages outside the reimbursable school meal programs that are sold to students on the school campus during the school day\* will meet or exceed the USDA Smart Snacks nutrition standards. These standards will apply in all locations and through all services where foods and beverages are sold, which may include, but are not limited to, a la carte options in cafeterias, vending machines, school stores, and snack or food carts.

### **Celebrations and Rewards**

All foods offered on the school campus will meet or exceed the USDA Smart Snacks in School nutrition standards including through:

1. Celebrations and parties. The district will provide a list of healthy party ideas to parents and teachers, including non-food celebration ideas. Healthy party ideas from the [Alliance for a Healthier Generation](http://www.healthiergeneration.org) ([https://www.healthiergeneration.org/take\\_action/schools/snacks\\_and\\_beverages/celebrations/](https://www.healthiergeneration.org/take_action/schools/snacks_and_beverages/celebrations/)) and from the [USDA](http://www.usda.gov).
2. Classroom snacks brought by parents. The District will provide to parents a [list of foods and beverages that meet Smart Snacks](http://www.healthiergeneration.org) ([https://www.healthiergeneration.org/live\\_healthier/eat\\_healthier/alliance\\_product\\_navigator/browse\\_products/?product\\_category\\_id=720](https://www.healthiergeneration.org/live_healthier/eat_healthier/alliance_product_navigator/browse_products/?product_category_id=720)) nutrition standards; and
3. Rewards and incentives. The District will provide teachers and other relevant school staff a [list of alternative ways to reward children](http://www.healthiergeneration.org). ([https://www.healthiergeneration.org/take\\_action/schools/snacks\\_and\\_beverages/non-food\\_rewards/](https://www.healthiergeneration.org/take_action/schools/snacks_and_beverages/non-food_rewards/)) in order to reduce the use of foods and beverages as a reward, or withheld as punishment, such as for performance or behavior.

### **Fundraising**

Foods and beverages that meet or exceed the USDA Smart Snacks in Schools nutrition standards may be sold through fundraisers on the school campus\* during the school day\*. The District will make available to parents and teachers a list of healthy fundraising ideas - *examples from the Alliance for a Healthier Generation-* ([https://www.healthiergeneration.org/take\\_action/schools/snacks\\_and\\_beverages/fundraisers/](https://www.healthiergeneration.org/take_action/schools/snacks_and_beverages/fundraisers/))

and the [USDA](http://healthymeals.nal.usda.gov/local-wellness-policy-resources/wellness-policy-elements/healthy-fundraising) (<http://healthymeals.nal.usda.gov/local-wellness-policy-resources/wellness-policy-elements/healthy-fundraising>). Any organization at either school that wishes to have a fundraiser during school hours, must obtain approval from their building principal. Those organizations are asked to have all fundraisers approved by the end of August each school year. The building principal will respond to those requests in writing.

- *Schools will encourage non-food fundraisers, and those promoting physical activity (such as walk-a-thons, jump rope for heart, fun runs, etc.).*

### **Nutrition Promotion**

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout schools, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff and teachers, parents, students, and the community.

The District will promote healthy food and beverage choices for all students throughout the school campus, as well as encourage participation in school meal programs. This promotion may occur through:

- Implementing evidence-based healthy food promotion techniques through the school meal programs using [Smarter Lunchroom techniques](http://smarterlunchrooms.org/ideas); (<http://smarterlunchrooms.org/ideas>) and
- Promoting foods and beverages that meet the USDA Smart Snacks in School nutrition standards. Additional possible promotion techniques that the District and individual schools may use are available at [www.healthiergeneration.org/smartsnacks](http://www.healthiergeneration.org/smartsnacks).

### **Nutrition Education**

The District aims to teach, model, encourage, and support healthy eating by students. Schools will provide nutrition education and engage in nutrition promotion that:

- Is designed to provide students with the knowledge and skills necessary to promote and protect their health;
- Is part of not only health education classes, but also integrated into other classroom instruction through subjects such as math, science, language arts, social sciences, and elective subjects;
- Include enjoyable, developmentally-appropriate, culturally-relevant, and participatory activities, such as cooking demonstrations or lessons, promotions, taste-testing, farm visits, and school gardens;
- Promote fruits, vegetables, whole-grain products, low-fat and fat-free dairy products, and healthy food preparation methods;
- Emphasize caloric balance between food intake and energy expenditure (promotes physical activity/exercise);
- Link with school meal programs, cafeteria nutrition promotion activities, school gardens, Farm to School programs, other school foods, and nutrition-related community services;
- Teach media literacy with an emphasis on food and beverage marketing; and

- Include nutrition education training for teachers and other staff.
- All district health education teachers may provide opportunities for students to practice or rehearse the skills taught through the health education curricula.

### ***Essential Healthy Eating Topics in Health Education***

The District may include in the health education curriculum the following essential topics on healthy eating:

- The relationship between healthy eating and personal health and disease prevention
  - Food guidance from [MyPlate \(http://www.choosemyplate.gov/\)](http://www.choosemyplate.gov/)
- Reading and using USDA's food labels
- Eating a variety of foods every day
- Balancing food intake and physical activity
- Eating more fruits, vegetables, and whole grain products
- Choosing foods that are low in fat, saturated fat, and cholesterol and do not contain *trans* fat
- Choosing foods and beverages with little added sugars
- Eating more calcium-rich foods
- Preparing healthy meals and snacks
- Risks of unhealthy weight control practices
- Accepting body size differences
- Food safety
- Importance of water consumption
- Importance of eating breakfast
- Making healthy choices when eating at restaurants
- Eating disorders
- The Dietary Guidelines for Americans
- Reducing sodium intake
- Social influences on healthy eating, including media, family, peers, and culture
- How to find valid information or services related to nutrition and dietary behavior
- How to develop a plan and track progress toward achieving a personal goal to eat healthfully
- Resisting peer pressure related to unhealthy dietary behavior
- Influencing, supporting, or advocating for others' healthy dietary behavior

[USDA's Team Nutrition](#) provides free nutrition education and promotion materials, including standards-based nutrition education curricula and lesson plans, posters, interactive games, menu graphics, and more.

### ***Food and Beverage Marketing in Schools***

The District is committed to providing a school environment that ensures opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. The District strives to teach students how to make informed choices about nutrition, health, and physical activity. These efforts will be weakened if students are subjected to advertising on District property that contains messages inconsistent with the health information the District is imparting through nutrition education and health promotion efforts. It is the intent of the District to protect and promote student's health by permitting advertising and marketing for only those foods and beverages that are permitted to be sold on the school campus, consistent with the District's wellness policy.

Any foods and beverages marketed or promoted to students on the school campus\* during the school day\* should meet or exceed the USDA Smart Snacks in School nutrition standards.

#### **IV. Physical Activity**

Children and adolescents should participate in 30 to 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a comprehensive, school-based physical activity program (CSPAP) that includes these components: physical education, recess, and classroom-based physical activity ("Brain Breaks"), and the district is committed to providing these opportunities. Schools will ensure that these varied opportunities are in addition to, and not as a substitute for, physical education (addressed in "Physical Education" subsection). All schools in the district will be encouraged to participate in *A.C.E.S. (All Students Exercising Simultaneously)* in order to successfully address CSPAP areas.

Physical activity during the school day (including but not limited to recess, physical activity breaks, or physical education) **should not be withheld** as punishment for any reason. The district will provide teachers and other school staff with a [list of ideas](#) for alternative ways to discipline students.

To the extent practicable, the District will ensure that its grounds and facilities are safe and that equipment is available to students to be active. The District will conduct necessary inspections and repairs.

##### ***Physical Education***

The District will provide students with physical education, using an age-appropriate, sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits.

All students will be provided opportunity to participate in physical education classes. The District will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary.

All District K-8 **elementary students** in each grade will receive physical education for at least 90 minutes per week throughout the school year.

All District **secondary students** (high school) are required to take the equivalent of one academic year of physical education.

The District physical education program will promote student physical fitness through individualized fitness and activity assessments (via the [Presidential Youth Fitness Program](#) or other appropriate assessment tool) and will use criterion-based reporting for each student.

- *Students will be moderately to vigorously active for at least 50% of class time during most or all physical education class sessions.*
- *All physical education classes in District are taught by licensed teachers who are certified or endorsed to teach physical education.*
- *Waivers, exemptions, or substitutions for physical education classes are not granted. Exceptions to this rule are detailed in the Calhoun High School Student Handbook.*

### ***Essential Physical Activity Topics in Health Education***

The District will include in the health education curriculum the following essential topics on physical activity when health education is taught:

- The physical, psychological, or social benefits of physical activity
- How physical activity can contribute to a healthy weight
- How physical activity can contribute to the academic learning process
- How an inactive lifestyle contributes to chronic disease
- Health-related fitness, that is, cardiovascular endurance, muscular endurance, muscular strength, flexibility, and body composition
- Differences between physical activity, exercise, and fitness
- Phases of an exercise session, that is, warm up, workout, and cool down
- Overcoming barriers to physical activity
- Decreasing sedentary activities, such as TV watching
- Opportunities for physical activity in the community
- Preventing injury during physical activity
- Weather-related safety, for example, avoiding heat stroke, hypothermia, and sunburn while being physically active
- How much physical activity is enough, that is, determining frequency, intensity, time, and type of physical activity
- Developing an individualized physical activity and fitness plan
- Monitoring progress toward reaching goals in an individualized physical activity plan
- Dangers of using performance-enhancing drugs, such as steroids
- Social influences on physical activity, including media, family, peers, and culture
- How to find valid information or services related to physical activity and fitness
- How to influence, support, or advocate for others to engage in physical activity
- How to resist peer pressure that discourages physical activity

### ***Recess (Elementary)***

All elementary schools will offer at least **20 minutes of recess** on all or most days during the school year. If recess is offered before lunch, schools will have appropriate hand-washing facilities and/or hand-sanitizing mechanisms located just inside/outside the cafeteria to ensure proper hygiene prior to eating and students are required to use these mechanisms before eating. Hand-washing time, as well as time to put away coats/hats/gloves, will be built in to the recess transition period/timeframe before students enter the cafeteria.

**Outdoor recess** will be offered when weather is feasible for outdoor play.

In the event that the school or district must conduct **indoor recess**, teachers and staff will follow the indoor recess guidelines that promote physical activity for students, to the extent practicable.

Recess will complement, not substitute, physical education class. Recess monitors or teachers will encourage students to be active, and will serve as role models by being physically active alongside the students whenever feasible and as long as it does not negatively affect safety and supervision.

### ***Physical Activity Breaks (Elementary and Secondary)***

The District recognizes that students are more attentive and ready to learn if provided with periodic "BRAIN BREAKS" when they can be physically active or stretch. Thus, students will be

offered **periodic opportunities** to be active or to stretch throughout the day on all or most days during a typical school week. The District recommends teachers provide short (3-5 minute) physical activity breaks to students during classroom time. These physical activity breaks will complement, not substitute, for physical education class, recess, and class transition periods.

The District will provide resources and links to resources, tools, and technology with ideas for physical activity breaks. Resources and ideas are available through [USDA](#) and the [Alliance for a Healthier Generation](#).

### ***Active Academics***

Teachers will incorporate movement and kinesthetic learning approaches into “core” subject instruction when possible (e.g., science, math, language arts, social studies, and others) and do their part to limit sedentary behavior during the school day.

The District will support classroom teachers incorporating physical activity and employing kinesthetic learning approaches into core subjects by allowing for professional development opportunities and resources, including information on leading activities, activity options, as well as making available background material on the connections between learning and movement.

Teachers will serve as role models by being physically active alongside the students whenever feasible.

### ***After School Activities***

The District offers opportunities for students to participate in physical activity either after the school day through a variety of methods. The District will encourage students to be physically active before and after school by participating in extracurricular activities such as sports or clubs.

## **V. Other Activities that Promote Student Wellness**

The District will encourage wellness activities across the entire school setting, not just in the cafeteria, other food and beverage venues, and physical activity facilities.

Teachers in the District are encouraged to coordinate content across curricular areas that promote student health, such as teaching nutrition concepts in mathematics.

### ***Community Partnerships***

The District will enhance relationships with community partners (i.e. hospitals, universities/colleges, local businesses, etc.) in support of this wellness policy’s implementation. Existing and new community partnerships and sponsorships will be evaluated to ensure that they are consistent with the wellness policy and its goals. Currently, the schools have developed relationships with the University of IL Extension office, the Calhoun Health Department, and the Calhoun Crunch.

### ***Community Health Promotion and Engagement***

The District will promote to parents/caregivers, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. Families

will be informed and invited to participate in school-sponsored activities and will receive information about health promotion efforts.

As described in the “Community Involvement, Outreach, and Communications” subsection, the District will use electronic mechanisms (such as email or displaying notices on the district’s website), as well as non-electronic mechanisms, (such as newsletters, presentations to parents, or sending information home to parents), to ensure that all families are actively notified of opportunities to participate in school-sponsored activities and receive information about health promotion efforts.

### ***Staff Wellness and Health Promotion***

The DWC will have a staff wellness subcommittee that focuses on staff wellness issues, identifies and disseminates wellness resources, and performs other functions that support staff wellness.

Schools in the District will implement strategies to support staff in actively promoting and modeling healthy eating and physical activity behaviors. Examples of strategies schools will use, as well as specific actions staff members can take, include “Wednesday Walk Day” (early a.m. walk with students, led by teachers/staff), “Calhoun Faculty/Staff Wellness Club”, and the “Calhoun STEPS” competition. The District promotes staff member participation in health promotion programs and will support programs for staff members on healthy eating/weight management that are accessible and free or low-cost.

### ***Professional Learning***

When feasible, the District will offer annual professional learning opportunities and resources for staff to increase knowledge and skills about promoting healthy behaviors in the classroom and school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class). Professional learning will help District staff understand the connections between academics and health and the ways in which health and wellness are integrated into ongoing district reform or academic improvement plans/efforts.

## **Glossary:**

**Extended School Day** - time during before and after school activities that includes clubs, intramural sports, band and choir practice, drama rehearsals, etc.

**School Campus** - areas that are owned or leased by the school and used at any time for school-related activities such as the school building or on the school campus, including on the outside of the school building, school buses or other vehicles used to transport students, athletic fields, and stadiums (e.g. on scoreboards, coolers, cups, and water bottles), or parking lots.

**School Day** - midnight the night before to 30 minutes after the end of the instructional day.

**Triennial** – recurring every three years.
